

## PROJECT SUMMARY

### CLIENT

Transunion  
Burlington, ON

### DESIGN FIRM

Alternate Choice Inc.

### PRODUCT

Cosmopolitan Systems

### SIZE

140 workstations

## Transunion

In Jan 2010, Transunion began a search for a single innovative office solution. They were currently situated in 3 separate locations that created logistic and communication difficulties.

Tayco was brought in to facilitate the amalgamation of 3 locations and design a whole new cohesive work environment for Transunion. Utilizing the versatile Cosmopolitan system, Tayco created a new highly functional work environment comprising of 140 workstations, accommodating associates, managers, supervisors and executive staff.

Tayco's service and installation team excelled in dealing with the needs of Transunion. "I am extremely pleased at how well they all worked together. Customer service at Tayco has been super; everyone working on the project has been of the greatest help and support. As for the installation team, they are absolutely fantastic".
