Assiniboine Credit Union  
Winnipeg, MB

##### DESIGN FIRM

Andrew Wach Architects

##### PRODUCT

Up Systems

##### SIZE

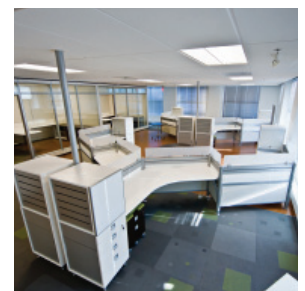

170 Open Plan Workstations  
35 Private Offices  
2 Reception Stations

## Assiniboine Credit Union

The Head Office Consolidation Project for the Assiniboine Credit Union was a large office renovation with the merging of multiple off-site offices under one roof.

When researching furniture for the project, ACU was interested in finding furniture that would allow the maximum amount of light to penetrate the space while also offering the most flexible options and configurations for each of the specific departments. Employees wanted to have privacy, yet still feel they were part of the larger team. A low open, panel-less system that allowed for maximum flexibility as well as incorporating a height-adjustable work surface to accommodate universal access was required. The Tayco Up system hit every target.

Today, the team at ACU is thrilled with the new office furniture. Each work surface has been installed customized to the employee's height requirements, aiding in the reduction of workplace injuries due to poor ergonomics. The spaces are bright and open and the staff are very pleased with the outcome.
