CSA

Canadian Standard Association (CSA) is a not-for-profit membership-based association serving business, industry, government and consumers in Canada and the global marketplace. CSA's objective was to improve the working environment for a group consisting of engineers and corporate support staff, with a layout that provided privacy – a critical point for the industry due to proprietary information that needs to be protected.

Looking to address ergonomic issues, health, safety, and environmental concerns, CSA selected Tayco's Cosmopolitan ahead of the competition. Cosmopolitan's layout flexibility allowed CSA to achieve an open concept feel, while still maintaining the required privacy level. Tayco went above and beyond the competition by supplying a mock-up of the intended station that was complete with a color scheme recommended by Tayco's design team to best suit CSA's requirements.
