

# PANEL SHIELD

E60PQ-140003/029/PQ

## No Damage to Current Set Ups!

The attachment hardware for the Panel Shield privacy screen does not cause damage to the current panels or worksurfaces when being installed or removed. It is in accordance with SA E60PQ-140003/C Annex A 1.1 Specification for Workspaces.

Safety is paramount, but it should not come at the cost of function or design. The Patent Pending Panel Shield, designed in collaboration with Fig40, is an innovative solution for workplaces looking to increase their panel heights.

Quick and easy to install with the option to both reconfigure in the future and remove if needed without the use of installers. This unique product is compatible with virtually any panel system offered in the Federal Government Supply Arrangement Program.

The Panel Shield offers substantial protection. With an impeccable fit and finish and two discreet styles, the Panel Shield extends the height of the panels as high as 24" and is comprised of easy to clean materials to help reduce the risk of spreading infection in the workplace. The Panel Shield is available in clear tempered glass.

# UP SHIELD

E60PQ-140003/029/PQ

## No Damage to Current Set Ups!

The attachment hardware for the Up Shield privacy screen does not cause damage to the current panels or worksurfaces when being installed or removed. It is in accordance with SA E60PQ-140003/C Annex A 1.1 Specification for Workspaces.

Everyone deserves a safe and healthy workspace, and the Up Shield will help you provide the ultimate one.

Perfect for freestanding desks, the Up Shield uses Tayco’s signature Up clamp to attach a clear or frosted acrylic divisional screen without damaging the worksurface.

The easy to install Up Shield is offered at 29” high, with 24” above the worksurface, and 4” below the worksurface for ultimate protection.

Create a safe environment for each user with the Up Shield.
