

HALIFAX

High Design, High Functionality

tayco®

HALIFAX

Halifax is Tayco's modern private office collection crafted to support the evolving, everyday office. Balancing high design with high function, Halifax offers warm, inviting aesthetics with subtle industrial touches, ideal for today's multipurpose workspaces.

This versatile collection supports both individual focus and team collaboration through a wide range of desk configurations, table formats, and integrated wire management. With a thoughtful design that embraces flexibility, Halifax brings together traditional and emerging planning styles in one cohesive, functional, and visually elevated system.

At the heart of Halifax are two distinct leg styles—each engineered for performance and design impact.

The A-Leg, with its rectangular shape and removable infill, offers accent colour options and integrated wire management. Its structure allows for clean table linking and optimized leg clearance, making it perfect for larger workstations and executive layouts.

The V-Leg stands out for its independent, beam-free design. Angled for strength and available in both standing and seated orientations, the V-Leg delivers built-in cable concealment through its internal cavity. Its elegant “V” shape creates a sleek silhouette while providing exceptional stability.

With Halifax, beauty meets durability in a system that adapts seamlessly to the future of work.

Application

Private office, Desking
