## THIN TRIM

Our popular integrated panel system is getting a stylish new twist with our latest trim offering! With its slimmer, sleeker profile, the Thin Trim slims a Cosmo workspace and simplifies divisions with precise, clean lines.

This new style is 7mm thinner than our Straight Trim, creating a truly minimal trim offering. The Thin Trim boasts full aluminum connections, for lightweight, strong points of contact and support.

This new trim presents an opportunity for the classic high-quality framed style of Cosmo to shine in a new, modern light. A refreshing take on our proven tile and frame system, Cosmo Thin Trim promises to be a perfect combination of Tayco's design and engineering abilities.
