BETTER DESIGN
EVOLVES

A MESSAGE FROM OUR CEO

In all my years leading Tayco, 2020 has been one of exceptional, formative change. Despite all that is happening in the world, I'm proud of this organization and all its accomplishments. At the very core, we continue to create meaningful and inspirational workplaces where people can learn, collaborate and execute on extraordinary ideas.

Better design is diverse.

At Tayco, we believe that embracing diversity helps to create innovative solutions. We are better together. Diversity is our strength. We are proud to be recognized as a Great Place to Work in Canada, and continue to work towards a culture of respect, tolerance, education, listening and understanding.

As we design for an increasingly global audience, our open-mindedness, diversity and unique perspectives lead to designs that address the concerns of the modern 21st-century workspace.

Better design has purpose.

Office design has changed a lot in the last couple of years. One thing that has stayed the same is our steadfast commitment to better design. Much like the evolution of this Look Book, we've continually improved our designs to reflect progressive and functional trends.

In 2020, we launched a line of collaborative tables (Koko, Kip, Hanna, Norris) for our multipurpose workspaces. Born out of our desire to create a product that could respond to the evolving needs of our clients, this collection was built with flexibility in mind.

At the core of our DNA, we believe in this user-centric process to create universally applicable office solutions. We are a Canadian company, yes we sell beautifully designed furniture, but we always put Customer experience first.

Better design is sustainable.

Sustainability and design are not mutually exclusive. In fact, they are both requirements for all of Tayco's products. Concern for the environment has always shaped the way we live, work and play.

At Tayco, sustainability is at the forefront of our minds. We are proud to say that we were the first manufacturer to receive Level 2 ANSI/BIFMA e3-2019 certification for sustainable, progressive furniture design. From the materials we use to our industrial processes, we make an effort to reduce our environmental footprint at all stages of our supply chain. Our goal? To build longer-lasting and better-functioning products that can be replaced less frequently.

Better design evolves.

2020 has been a transformative year for Tayco and much of the world. As workplace design continues to evolve, we continue to take up the challenge of designing solutions that respond to changing client needs and new realities.

COVID-19 will change the office forever. But it's also an opportunity to reinvent it and make it better than ever. The idea of flexible workspaces is here to stay, and we are poised to adapt with products such as our Shield system. With safety as the focal point, the Shield line can help bring people back to work, while keeping the environment safe with physical panels and screens.

We are as committed today as ever. We can't wait to show you how our designs will change the future.

Kevin Philips
CEO
