## application guidelines Grain direction

### HORIZONTAL SURFACES

When ordering a directional laminate, the grain will run the direction of the width of the worksurface (excluding bridge surfaces), hutch or storage top. Grain on bridge modesty run vertically so the grain will run the same direction on the entire suite.

### VERTICAL SURFACES

Directional laminates run vertically on vertical surfaces such as cabinet doors, pedestal drawer fronts and gables, as well as all cabinet, lateral file and pedestal kick-plates. The grain runs horizontally across the width of modesty panels.

## Caution

### Load Bottom Drawer First

- Operate one drawer at a time
- Units may tip if loaded incorrectly
- Units should be attached to a wall or other furniture to reduce tipping hazard
- Always load the heaviest files in the bottom drawer

### Heavy Load

- Some products must be anchored to wall to ensure stability & safety.
- It is the owner and installers responsibility to ensure that the wall type and construction is of sufficient strength to carry the loads of any wall mounted products and their contents.
- Failure of the wall and anchors to support all imposed loads may result in property damage and/or personal injury.
- Tayco can provide size and empty weight of its products only. As wall blocking is considered a building construction process, Tayco cannot provide recommendations in this respect and cannot be responsible for damage or injury that may occur as a result of improper installation and/or blocking.

### Instability Hazard

Mobile items on casters such as flip top, personal and movable tables of any type and storage items of any type may present an instability hazard if not secured correctly while in use or in storage. Flip top tables or training tables of any type, are inherently more unstable when folded. Tayco provides the following guidelines & warnings when using mobile products:

- Lock casters immediately after moving. Do not leave the casters unlocked when in use or in storage.
- Motion may increase the instability of any item with casters. If the wheels hit an obstruction the table's forward momentum often causes overturn, especially if the item is not equipped with wheel extensions. Exercise strong caution while moving these items.
- Use caution when abrupt level changes in the floor are present (such as a doorway or room threshold) as caster failure or tipping may result.
- Do not stand, sit or lean on mobile items for support. They are not intended for this use and personal injury or property damage may result.
- Mobile units that feature height adjustable elements must be lowered to the minimum compressed height when moving to prevent instability. It is also recommended the user remove all computer equipment or other accessories to prevent possible weight imbalance or damage to equipment.
- Failure to follow the guidelines above may result in property damage or personal injury.
