

# BRIDGEWAY

Adaptable power for  
evolving workspaces

tayco®

# BRIDGEWAY

Bridgeway is Tayco's adaptable power beam solution, designed and manufactured in Canada to support modern, evolving workspaces. By combining accessible power, purposeful privacy, and a minimal visual footprint, Bridgeway redefines how infrastructure supports open-plan environments.

Bridgeway delivers power exactly where it's needed, without reliance on walls, ceilings, or floor cores. Its clean lines, modular construction, and flexible configurations create a refined, contemporary solution that balances performance, adaptability, and design clarity.

Tayco's power beam system supports a wide range of workspace configurations, from height adjustable benching and collaborative zones to lounges, reception areas, and waiting spaces. Its modular beam system allows layouts to evolve over time while maintaining a cohesive, uncluttered aesthetic.

With multiple configuration options, integrated power delivery, and compatibility with Echo PET, acrylic, or glass privacy screens, Bridgeway helps teams strike the right balance between openness and focus—adapting as the workspace changes.

## Application

Open plan offices, height-adjustable benching, collaboration areas, lounges, receptions, waiting spaces

## Options

Straight, 90°, and 120° beam configurations  
22" and 29" beam height options  
Compatible with Echo PET, acrylic, and glass privacy screens  
Available in 21 Tayco metal finish options  
Multiple foot options available to suit different layouts and applications

## Design

A streamlined, architectural design that creates a cohesive look across power, fencing, and panel solutions—supporting workspaces that feel intentional, refined, and unified
